### REASONS FOR ALLOWANCE

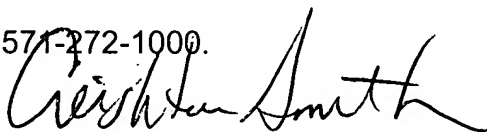

The following is an examiner's statement of reasons for allowance: neither Sakata nor any of the other references of record teach the receiving and sending steps to be over the same "first network". Rather, Sakata clearly teaches that the request and pointer from mobile terminal to the advertising information device is over the **RFID** network, while the pointer and Internet information is over a different network, i.e., the wireless Internet, than the RFID network previously used for the request and pointer. However, applicant's method steps contains the previously overlooked step of **accessing** and **storing** the requested information at a location associated with the pointer. Absent this **accessing** step, applicant's claim would read upon internet search on Google or Yahoo, because a PC is now being used as a telephony terminal for VoIP. No obvious combination of references found would have taught on of ordinary skill in the art to make and use applicant's method and system as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
